#### **DETAILED ACTION**

#### Election/Restriction

Claims 1-26 are pending in this application.

Claims 1-26 directed to a Lateral high breakdown voltage device are restricted as follows:

The claims are directed to the following patently distinct species of the claimed invention:

#### A/ Species I.

as best as can be understood is described in claim 1 is directed to an integrated lateral high breakdown voltage MOSFET and low breakdown MOSFET

## B/ Species II.

as best as can be understood is described in claim 9 is directed to an integrated lateral high breakdown voltage MOSFET and low breakdown MOSFET with body diffused layer formed on the surface side of the semiconductor substrate.

## C/ Species III.

as best as can be understood is described in claim 17 is directed to an integrated lateral high breakdown voltage MOSFET and low breakdown MOSFET with buried layer formed in the semiconductor substrate.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 2. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any

Art Unit: 2818

amendment of inventorship must be accompanied by a diligently filed petition under 37

CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

**CONCLUSION** 

4. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Thinh T Nguyen whose telephone number is 571-272-1790.

The examiner can normally be reached on 9.00 AM 6.00 PM Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, DAVID NELMS can be reached on (571) 272-1787. The fax phone numbers for the

organization where this application or proceeding is assigned are (703) 872-9306 for regular

communications and (703) 872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 308-1782.
